INVENTION: FEDORA BOUTONNIERE / CORSAGE VASE PIN

HOLDER/CONTAINER

DESCRIPTION OF THE PREFERRED EMBODIMENT

1) A—Process of making and using the invention.

Process: The process of making the invention is simple. Starting with a die cast mold by a jewelry manufacture. The mold or molds uses precious metals such as, gold, silver, platinum, gold plated nickel bronze any base metal. Several versions of the face of the vase are molded to the vase and the clasping pin are molded to the vase. Custom ordered units with engraved fronts or different logos can be used. Including settings of any or all precious stones. The holder is a plastic insert that fits snugly into the vase. The pin is soldered to the back of the vase and attaches to the material for secure holding. The face of the vase is custom or repetitive design for consumer's request. A plastic unit is not desired for this is a keepsake item. Plastic can not be engraved nor can a clasping pin be attached.

2) Use of the invention:

The use of this invention is the containment and holding of a boutonniere or a corsage. Eliminating the stick pin. Elegance hides the stem of the flower. Allowing a decorative keepsake and the elegant look of jewelry. With a wide variety of custom designed fronts. This invention can be used for all occasions. The use of this invention simplifies the ability to wear a boutonniere or a corsage, adding to the elegance of the flower, and the au it is worn.
